

Laboratory Specific Biological Safety Training

PI: \_\_\_\_\_ Department: \_\_\_\_\_

All persons working in biological laboratories must have site specific biological safety training before beginning work. Training must be conducted by a principal investigator (PI) or their designee.

List the biohazardous substances that may be found in the laboratory, including rDNA and its products that may pose a hazard to the health of laboratory staff, community, or if released into the environment:

[Empty box for listing biohazardous substances]

List the symptoms associated with exposure to the materials listed above:

[Empty box for listing symptoms]

The following topics should be covered during the training. Check all that are covered.

- Aseptic technique
- Personal protective equipment (*i.e.* PPE as detailed in Biosafety Manual and BMBL)
- Activities of concern (*e.g.* sonication, centrifugation, sharps use etc.)
- Containment requirement (*e.g.* Biosafety Level 1 or 2)
- Disinfection and sterilization procedures (as detailed in Biosafety Manual and Spill Response Plan)
- Biological and biohazardous waste management
- Locations of required signs, notices, and EHS Biological Safety Manual
- Where biological material is used and stored within the lab(s) and restrictions on that use
- Review of written protocols involving biological and biohazardous materials
- Review emergency procedures (from Laboratory Safety Manual)
- Location of safety equipment (*e.g.* spill kits, spill cleanup materials, eye wash, safety shower *etc.*)
- Review incident reporting procedures
