

Laboratory Floor Plans

Draw a floor plan for each room that is covered by this manual. Place it in the Emergency Contacts portion of the Laboratory Safety Plan. Note the locations of any exits and safety equipment present in the lab. Some examples would include:

Fire/Life Safety Items

- Fire Extinguishers
- Direction of Exit
- Emergency Contact Information
- Fire alarm pull station

Laboratory Safety Equipment

- Eyewash station
- Safety Shower
- Fume hoods
- Glove Boxes
- Spill kits
- First Aid Kits
- Flammable storage Cabinet

(If select carcinogens, reproductive toxins, select agents, highly toxic or highly dangerous chemicals are in use; a designated area must be specified. This area can be the entire laboratory, a fume hood, or a portion of the laboratory.)
